

Introduction to VERT

- Research began in 2001 to create a Training Simulator for Radiotherapy
- Collaboration between the University and the NHS
 - Department of Computer Science, University of Hull
 - Hull and East Yorkshire NHS Trust
- Virtual Ltd. founded in 2007

Virtual Ltd

- Based in Hull since 2007
- Local Employer
- Software Development Business
- Hardware R&D
- Sales & Support
- UK Manufacturing
- International Distribution
- ISO 9001 Quality Certification

The Flight Simulator for Radiotherapy A Virtual Linac

- A fully interactive, life size visualisation of a radiotherapy treatment room
- Authentic controls are used to operate the virtual Linac
- Deliver beams, visualise structures and dose
- Safe environment for training

Why do you need VERT?

- Train student therapists
- Inter-professional learning
- Enhanced visualisation for developmental learning
- Additional training resource for visitors and local staff
- Technique development and review
- Test technical competence during admissions
- Outreach programmes and Increase admissions and public awareness

The Impact of
VERT

Global Installations

112 Systems in 21 Countries

- England
- Denmark
- Ireland
- Wales
- Holland
- Canada
- United States
- India
- Switzerland
- Russia
- Australia
- Italy
- New Zealand
- France
- South Africa
- Germany
- Hong Kong
- Israel
- Malta
- Northern Ireland
- Belgium

European Installations

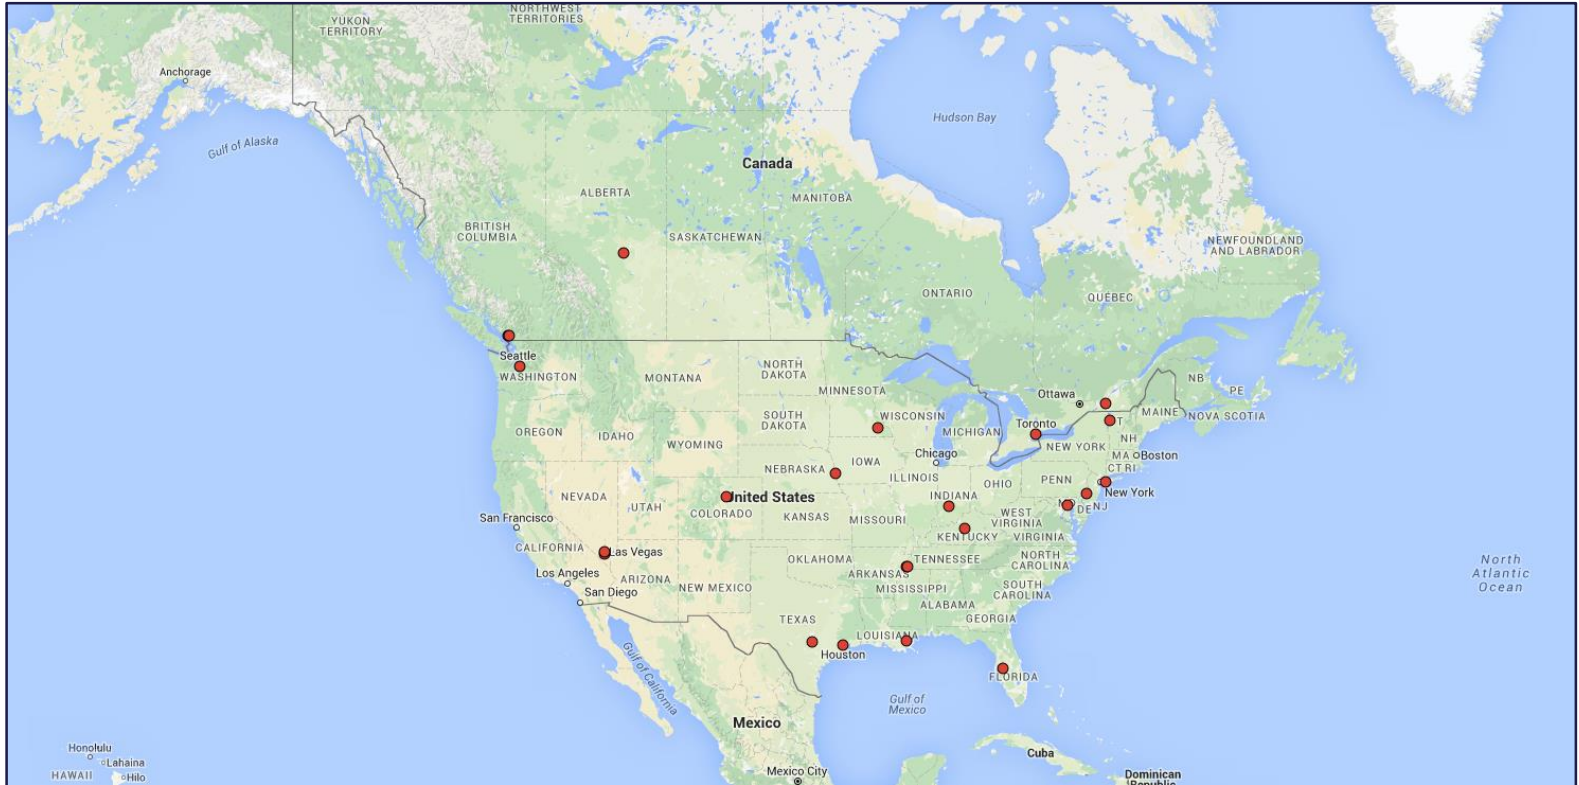

66 Systems in 13 Countries

- England
- Wales
- Ireland
- Denmark
- Holland
- Switzerland
- Belgium
- Russia
- Italy
- France
- Germany
- Malta
- Northern Ireland

Northern America Installations

22 Systems in 19 States

- Toronto
- Vancouver
- Burnaby
- Westmount
- Edmonton
- Bellevue, WA
- Denver, CO
- Las Vegas, NV
- New Orleans, MS
- Tampa, FL
- Houston, TX
- Las Vegas, NV
- Philadelphia, PA
- Burlington, VT
- Bloomington, IN
- Memphis, TN
- Baltimore, MD
- Rochester, MN
- Garden City, NY
- San Marcos, TX
- Omaha, NE
- Lexington, KY

UK and Ireland Installations

51 Systems in 4 Countries

- Wales
- Northern Ireland
- Ireland
- England

- 112 systems worldwide
- 21 Countries
- 16 Distributors
- First installation 2007

Installation breakdown by type

Immersive VERT Business	5
Immersive VERT Cinema	32
Seminar VERT Business	58
Seminar VERT Cinema	3
Portable VERT	11
Recruitment VERT	2
2D VERT	1
Total Systems (May 2015)	112

Examples of
VERT

A cost effective compact VERT solution

- Installed in seminar and large meeting rooms
- Dedicated room not required but desirable
- No significant refurbishment required
- Possible to upgrade later to Immersive VERT

Forward 3D projection

Projector, PC, screen, cinema glasses, hand pendants supplied as part of the system.

A state of the art VERT solution

- Installed in an auditorium or large classroom environment
- Aperture wall construction and some refurbishment required.
- Staged area for interaction within virtual treatment room
- Dual or single 3D projection
- Tracking system optional

Rear projection 3D system

Projectors, screen, PC, control panel, in room monitor, 3D professional glasses supplied as part of the system.

Immersive VERT

Room prepared for VERT Installation as per room preparation guidelines

Projector room, post system installation - Cinema grade projector

In the VERT Room. The team getting some “Hands on” as part of the system training

University of Otago, Wellington, New Zealand

Seminar System – installed January 2013

University of South Australia, Adelaide, Australia

Seminar System – installed December 2011

Immersive VERT MD Anderson Cancer Centre

Routinely Ranked the World's No. 1 Cancer Centre

State of the art system
Immersive VERT system with tracking that gives users a
holographic experience.
System went live in September 2010.

Seminar VERT

St. Catharine's Community College, Kentucky, USA

Seminar System – installed August 2013

Fonty's Paramedic Highschool Eindhoven, The Netherlands

Seminar System – installed August 2014

University of Vermont, Vermont, USA

Seminar System – installed November 2012

3D business grade projector and VERT system went live in August 2010

The challenge of fitting a VERT system into a hospital with few rooms available
The most compact installed Seminar system

The Benefits of Simulation

The Future

- New treatment machines
- 6DOF couches
- More detailed simulation of equipment
- Proton plan import
- Improved realism
- CBCT online matching tool

- Multiple Modalities
 - CT
 - MRI
 - PET
 - Dose
- Image Fusion
- Plan Comparison
- 4D capabilities
